

Międzychód Preserves

Międzychód is a city in the Wielkopolska [Greater Poland] Province, surrounded by nature reserves, known as Land of 100 Lakes and the clean environment. This is also the name of the 110 year old fruit and vegetable processing plant. We specialise in the production of ready made meals (i.e. stuffed cabbage rolls, meatballs or tripe), well-balanced ready made meals (i.e. chickpeas with vegetables, chicken with vegetables and rice), hot sauces, ketchups, tomato paste, gherkins and jams. We produce under the name Międzychód as well as name dedicated to foreign markets.

Owing to our plant's ideal location the best products are used and, at the same time, ensures communication facilities. Międzychód is located just under 200 km away from the German border, close to the main transport nodes. As a result, we have very good conditions for exporting and we are able to deliver our products to any place on the globe.

We offer a unique quality on the market as we do not add preservatives, flavour enhancers, artificial dyes or aromas. Instead, natural spices, vegetables and high quality meat guarantee the taste of our products. We use regional products from the Land of 100 Lakes and resort to the services rendered by the local farmers who are anything but anonymous to us. We provide consumers with healthy dishes, based on the local food processing traditions.

Międzychód can boast the most modern production line for ready meals in Poland and one of the most modern in Europe. It allows us to produce balanced meals and more. These products ensure the required doses of protein, carbohydrates, vitamins and micro elements for the body, while their energetic value is around 400 kcal. Similar meals available on the market may contain up to 800-1000 kcal. Our complete dishes are also made with high fibre flour which facilitates digestion. The Międzychód plant also has the state of the art equipment thanks to which we can control the raw materials ordered by us as well as the meals we produce. We check the amount of fat as well as water in the meat that delivered to us. Raw materials not compliant with our standards are simply sent back. State of the art technology combined with 110 years of tradition and the recipes allows us to provide consumers with top quality, uniquely delicious products. We have ambitious plans for the future, which we will consistently implement so the company can develop further and expand its offer.
